

Chat Extraction

Raw conversation -> structured working information

BEFORE

Synthetic customer chat

CUSTOMER

I have been thinking about selling hot sauce at farmers markets but I am all over the place on it.

AI

What have you decided so far?

CUSTOMER

Three sauces maybe. Mild green, smoky red, and one that is actually hot.

The rest of the chat includes:

revisions • uncertain costs • brand ideas • research • deferred work

AFTER

Farmers Market Hot Sauce Project

CURRENT CONCEPT

Small three-flavor farmers-market test before major inventory or equipment spending.

VALIDATION BATCH

6 bottles per flavor • 18 total • provisional

WORKING BRAND

Pepper Riot — current favorite, not final; availability must be checked.

UNVERIFIED NUMBERS

\$8 retail • \$2 ingredient cost • ~\$1 bottle cost

THIS WEEK

Compare three markets; research permit/home-production rules; make test recipes; calculate actual cost; contact Jen; check name availability.

DEFERRED

Website • large batch • tent • card hardware • professional labels
